

THERAPEUTIC APPLICATIONS

- INFLAMMATION
- LIGAMENT & TENDON INJURIES
- BROKEN BONES
- LAMINITIS
- HEMATOMAS, WOUNDS & SOFT TISSUE TRAUMAS
- DENATURES & CONTROLS PROUD FLESH
- CORNEAL ULCERS
- MINIMIZES SCARRING
- ALLEVIATES POST TRANSPORT DEFICIENCY
- FOAL PNEUMONIA
- VIRAL & BACTERIAL INFECTIONS
- FELINE UPPER RESPIRATORY TRACT INFECTIONS
- ARTHRITIS
- CANINE HIP DYSPLASIA

CONSISTENT RESOLUTIONS

The Ig2000 OFFERS

**USER FRIENDLY OPERATION
PORTABILITY
RUGGED DURABILITY
LOW MAINTENANCE**

**110/230VAC U.S. / EUROPEAN
or 12V BATTERY OPERATION**

**ADJUSTABLE
POWER SETTINGS**

**ADJUSTABLE
AUTO-STOP THERAPY TIMER**

**TOTAL USAGE TIME METER
KEY LOCK OFF-ON SWITCH
24hr. TECHNICAL SUPPORT**

INTRODUCING The Ig2000

**PATENTED
NON-INVASIVE
LIGHT THERAPY**

**SPECIALIZING IN LARGE
AND SMALL ANIMAL
ILLNESS, LAMENESS,
PAIN, AND
SPORTS RELATED
INJURIES**

BENEFITS OF The Ig2000 MEDICAL MODALITY

- 1.) OPTIMAL WAVELENGTH OF LIGHT OFFERS GREATEST SAFETY AND THE WIDEST RANGE OF EASY TREATMENT AND THERAPY OPTIONS
- 2.) VETERINARY AND TRAINER PROVEN MODALITY
- 3.) “DRUG FREE” THERAPIES
- 4.) EYE SAFE TO ANIMALS AND HUMANS
- 5.) NON-THERMAL, CAN NOT BURN THE ANIMAL OR USER
- 6.) CONSISTENT & REPEATABLE THERAPY RESOLUTIONS
- 7.) WORKS EQUALLY WELL ON ALL ANIMALS LARGE OR SMALL
- 8.) EASY AND SAFE TO APPLY

The Internationally Patented
Ig2000 VETERINARY DEVICE

INTRODUCING The Ig2000

Therapy with the Ig2000 generates a positive cascading immune system response in mammals that promotes a rapid and sustained healing response with consistent and repeatable resolutions to a wide range of ailments and injuries.

The Ig2000 veterinary therapeutic modality uses a non-invasive, non-thermal, light-energy-absorption technique, rather than penetration like other laser therapy systems on the market today. With an Ig2000 therapy there is no heating and no damage to healthy tissue (unlike many other therapeutic laser devices) and the Ig2000's unique laser energies are eye safe both to the animal *and* to the operator. This eye safe modality allows the Ig2000 to be used in treatments of corneal ulcers and other disorders of the eye where other laser devices can not be used. An Ig2000 Therapy initiates both a localized *and a* systemic therapeutic effect that enables the non-invasive treatment of internal *and* external disorders and ailments ranging from wounds and ulcers to burns and pneumonia, along with viral and bacterial infections. The Ig2000 can also be used as a stand-alone or adjunct therapeutic medical modality.

There is no other therapeutic modality that compares with The “Ig2000”.

The Ig2000 will change your animals health care dramatically

“I’ve found the Ig2000 to be an effective adjunctive therapy in multiple Equine and Small Animal cases. Local and Systemic infection as well as geriatric orthopedic disease react very quickly and positively to this therapy”. Debra Rykoff, D.V.M. Ventur-On Farm Clinic, Illinois

“There is a marked difference in tissue integrity after one to two treatments, immediate improvement in agility, and reduced recovery time for upper respiratory infections.” Kelley Bradford DVM, Umatilla, Florida.

Immuno-Genic Corporation is proud to introduce its amazing breakthrough biophotonic therapeutic veterinary medical device, the Ig2000. The Ig2000 medical modality uses a specific and unique “Patented wavelength” of healing light energies that are used in non-invasive therapy to improve animal health through modulation and regulation of the immune system. No known negative side effects have been observed or reported in more than 25 years of research in over 80,000 field and clinical therapies on large and small animals. Therapies show consistently positive and repeatable outcomes.

At the track, in the show barn, or in the small animal clinic, the Ig2000 provides “unique” therapeutic solutions.
